

This list comprises the top 100 albums/sets of the collection of Debra Jan Bibel. Such an item may contain multiple disks. The collection offers a musical portrait, insights into my mind and character at this present time; it will undergo further changes as I age and explore, and it does not signify any all-time bests. They are selected because they either have innovative creativity, or high complexity to bear repeated listening and discovery, or they effectively provide certain psychological states, such as arousal, meditation, awe, mellowness, desire for movement (dance), nostalgia for associated events, et cetera, and in some way the affected musical pattern is representative of composer, epoch, or artist. Whatever the reasons, they are Desert Island Discs, those that would be saved in an emergency. They are also Death Imminent Discs, those which I want to hear one last time.
